# ABOUT THE TREK THEME

JONATHAN MERRITT

2013

THE INSTITUTE GOES HERE

The Trek theme is inspired by the LCARS interface, originally designed by Michael Okuda.

The basic idea is that the LaTeX typesetting engine, heavily assisted by the TikZ drawing library, will format the title graphics for each slide automatically.

The Trek theme requires:

- XeLaTeX or LuaLaTeX (for font support)
- the Beamer document class
- TikZ drawing library

The following slides contain tests.

The three levels of the itemize environment:

- Level 1
  - Level 2
    - Level 3

The three levels of the enumerate environment:

01 | Level 1

02 | Second item on level 1

02-01 | Level 2

02-02 | Second item on level 2

02-02-01 | Level 3

02-02-02 | Second item on level 3
